Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3751

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 7-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claim 8, lines 14-15, there is no enablement for the feed pipe having a larger diameter, this can be corrected by changing "feed water pipe" to -muffling portion- in line 15; the remainder of lines 15-16 constitutes a runon sentence which can be corrected by inserting -water passing through said muffling portion- between "and" and "draws" and inserting -stalled- between "said" and "air" of line 16 and canceling the remainder of lines 16-17. Lines 19-20 are not enabled as "offset" is not found in the specification and what is "the tolerance of said Western style flush toilet stool". This can be obviated by replacing lines 19-20 with -which will stall air contained in the feed water-.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 fails to further structurally limit claim 9 in that "combined with each other in one body" is not definitive of any structural limitation.

Claims 1-6 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or

Art Unit: 3751

linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 8/10/07. The traversal is based upon the opinion that the search for the respective groups would be coextensive. Applicant presents no evidence for this reasoning and in fact this is not reality. The search for group I would require a generic search of the conduit art not required for group II. Therefore withdrawal of the requirement is denied and the requirement is hereby made final.
